SUMMARY

Aspiring Data Engineer with strong programming and problem-solving skills in Python and SQL. Experienced in building end-to-end ETL pipelines using Pandas, Apache Airflow, and PostgreSQL, with hands-on exposure to data cleaning, transformation, and validation across relational databases. Skilled in SQL query development, data pipeline orchestration, and API integration, with a growing focus on automation and AI-based workflows.

TECHNICAL SKILLS

- **Programming:** Python, SQL
- **Data Engineering:** ETL, Data Pipelines, Data Cleaning, Data Transformation, Data Validation, Data Modeling, Power BI
- **Python Libraries:** Pandas, NumPy, SQLAlchemy
- **Workflow & DevOps:** Apache Airflow, Docker, Git, GitHub, Linux
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Development:** Object-Oriented Programming (OOP), SDLC, Debugging, Agile Methodology
- **Application:** Streamlit, Groq API

EDUCATION

B.E. in Computer Science and Engineering

2021 – 2025

Sir Issac Newton College of Engineering and Technology, Nagapattinam, Tamil Nadu

CGPA: 7.58

Higher Secondary Education

2019 – 2021

Government Higher Secondary School, Nagapattinam, Tamil Nadu

Percentage: 73.6%

Projects

Memory Price ETL Pipeline

- Built an automated ETL pipeline to extract Stanford's historical DRAM/NAND pricing data, clean and transform records, and load processed data into PostgreSQL.
- **Tools:** Python, Pandas, Apache Airflow, PostgreSQL, Docker, SQLAlchemy, Pytest.
- **Outcome:** Automated scheduled data processing and enabled reliable SQL-based analysis through an orchestrated and containerised workflow.

Natural Language to SQL Query Generator

- Developed a web application that converts natural-language questions into executable SQL queries using the Groq LLM API and retrieves results from MySQL.
- **Tools:** Python, Streamlit, MySQL, Groq API, SQLAlchemy, Pandas.
- **Outcome:** Enabled non-technical users to explore sales data using natural-language prompts with SQL validation and interactive visualisation.

INTERNSHIP

Python Programming Intern

July 2024

Fantasy Solution, Tiruchirappalli, Tamil Nadu

- Cleaned and processed structured datasets using Python (Pandas, NumPy) to support data analysis.
- Wrote SQL queries to retrieve, filter, and manipulate data across relational databases.
- Gained hands-on exposure to the Software Development Life Cycle (SDLC) in a team setting.

CERTIFICATIONS

- **DataCamp:** Python Data Associate
- **AWS:** Cloud Foundation
- **Forage:** Tata Data Visualisation Virtual Experience
- **Infosys Springboard:** Big Data and Introduction to Data Science
